Location: Hyderabad

Contact no: +91 8328461187

OBJECTIVE STATEMENT

Full Stack Developer with 5+ years of experience in building and deploying **scalable web applications** using cutting-edge technologies. Skilled in **front-end development** with expertise in **React.js, HTML, CSS, and JavaScript**, and proficient in **back-end development** using **Node.js, Express, and MongoDB**. Experienced in collaborating within **Agile environments** to deliver robust, high-quality software solutions. Strong ability to design, develop, and maintain end-to-end applications, ensuring seamless integration and optimal performance. Adept at working in cross-functional teams to meet project goals and deliver user-centric solutions.

TECHNICAL PROFICIENCY:

Front-End Technologies:

- Frameworks & Libraries: React.js, Redux
- Languages & Markup: HTML5, CSS3, JavaScript (ES6+), TypeScript
- UI/UX: Responsive Design, Bootstrap, Material-UI, Tailwind CSS
- API Integration: RESTful APIs, Axios, Fetch API

Back-End Technologies:

- Server-Side Development: Node.js
- Databases: MongoDB, PostgreSQL, MySQL
- Security: Authentication & Authorization (JWT, OAuth)

DevOps & Tools:

- Version Control & CI/CD: Git, GitHub, GitLab, Jenkins
- Containerization & Orchestration: Docker, Kubernetes
- Cloud Platforms: AWS, Heroku

Testing & Quality Assurance:

- Testing Frameworks: Jest, Mocha, Chai, Cypress
- Development Practices: Test-Driven Development (TDD)

CARRIER PROFILE:

Experienced Full Stack Developer at WIPRO (2020 - Present)

PROFESSIONAL SUMMARY

- 5 years of experience as a UI Developer specializing in React.js, with expertise in HTML5, CSS3, Bootstrap, JavaScript, and React Hooks/Redux to build dynamic, responsive GUIs.
- Developed scalable and efficient web applications using Next.js, React, and

TypeScript.

- Skilled in working with Class and Arrow Function components, Props, State, Forms, Events, Lifecycle Methods, and ES6 JavaScript features.
- Proficient in React Fragments, Context API, Portals, React Router, and PropTypes.
- Extensive experience with React hooks such as useState, useEffect, useContext, and knowledge of useCallback, useMemo, and custom hooks.
- Strong experience with React Redux for state management.
- Experienced in testing web APIs with Postman to ensure correct responses.
- Collaborative team player with flexibility to work on diverse projects that enhance my skills and knowledge.
- Adaptable to work without time constraints and committed to delivering high-quality results.
- Strong problem-solving, critical thinking, and communication skills, with a focus on innovative solution.

ACADEMIC PROFILE

"I HAVE COMPLETED MY B.TECH DEGREE FROM **ADITYA COLLEGE OF TECHNOLOGY AND SCIENCE** ”

PROJECTS:

PROJECT:1

PROJECT NAME: E-COMMERCE PLATFORM REDESIGN

Description:

The E-Commerce Platform Redesign project involved revamping an existing online shopping platform to improve its user experience, performance, and scalability. The redesign focused on enhancing the front-end interface and integrating new features like product recommendation algorithms, real-time inventory updates, and a seamless checkout process. I was responsible for designing the UI/UX, implementing new features, and optimizing the front-end performance for a better user experience on both mobile and desktop.

Technologies: React, Redux, HTML5, CSS3, Bootstrap, Node.js, JavaScript, REST APIs, AWS, Git, Jira.

PROJECT:2

PROJECT NAME: Philips

Description:

Contributed significantly to the creation and continuous enhancement of the Philips HealthTech - Cable Medic 3.0, a comprehensive application suite designed for the operational management of medical devices and healthcare technology. Utilized

React.js and Node.js for front-end and back-end development, ensuring seamless integration of features and optimal user experience.

Successfully executed deployment strategies that ensured zero downtime and error-free releases, facilitating smooth transitions into production environments. Collaborated effectively with cross-functional teams to meet tight development schedules while maintaining high-quality standards. Currently overseeing a limited release to internal stakeholders with a strategic roadmap in place for a full-scale deployment in the upcoming months, aimed at enhancing operational efficiency in the healthcare technology space.

Technologies Used: HTML5, CSS3, Bootstrap, REST APIs, JavaScript, SpringBoot, Microservices, Node.js React.js, Redux, Visual Studio Code, Git, Postman.

PROJECT:3

PROJECT NAME:(J and J)

Description:

Johnson & Johnson's "Changing Health for Humanity" project represents their overarching mission to significantly improve global health outcomes by leveraging their extensive research, development, and manufacturing capabilities to produce innovative medical devices, pharmaceuticals, and consumer healthcare products, with a focus on addressing unmet medical needs, promoting preventive care, and driving equitable access to healthcare across diverse populations worldwide; essentially aiming to positively impact the health and well-being of people at every stage of life through their diverse product portfolio and commitment to social responsibility.

Technologies: React, Redux, JSX, HTML5, CSS, Bootstrap, Material UI, Hooks, TypeScript, Gira, Git, PowerShell.

DECLARATION:

I hereby declare that abovementioned particulars are true to the best of my knowledge and beliefs.
